Construction & Installation Co.

History:

PGS'S history begins in 1999. The company was registered in Bandar Abbas as an engineering and construction company. Thus began a history of uninterrupted and accelerated development.

Over the past 16 years, PGS has handled numerous projects of all sizes and complexities, thereby acquiring a wealth of experience and project management skills. However we start our route with "engineering for the better future" slogan. PGS has applied the latest technology available in the developed world. Today we expanded our portfolio of work to achieving the first grade by the approval authority in the field of buildings, facilities, roads and water project with various contracts with esteemed clients, especially NIOC (National Iranian Oil Company) and other esteemed clients.

According to the Certificate of Contracting Competency approved by the Board of Ministers and due to the attainment of the required qualification and confirmation of the competency to perform the following constricting affairs is announced:

1. Class I in the field of "Contraction & building"
2. Class I in the field of "Installation & Equipment"
3. Class III in the field of "Road & Transportation"
4. Class V in the field of "Hydraulics"
5. Class V in the field of "Oil & Gas"

Vision & Values:

■ **Excellence**

While using the latest in engineering and management sciences always ensures the highest quality standards are also based on internationally acknowledged procedures.

Innovation

Every engineering-related detail in completed and ongoing projects is constantly questioned and re-examined and innovative engineering solutions are being continually researched and developed for better and more efficient results.

■ **Speed**

Enhancing existing technologies in search of developing more and more rapid means of mobilization and project completion methods is the desire of each and every project - execution group

Safety

"Zero Accident" policy is both a goal and achievement at PGS. Continuously implementing the comprehensive Health Safety and Environment (HSE) policy to protect all employees and associates working at PGS offices, construction sites and related facilities. It is including protection from every kind of pollution, hazard and accident that may result from its business.

Being a good member of the community

Management of social impact includes the process of identifying, monitoring and managing the intended and unintended social consequences of a project. Its aim is to bring about a more sustainable and equitable environment.

Health, Safety & Environment System

"Zero Accident" and "zero environment impact" policy is both a goal and an achievement at PGS. The company implements its comprehensive Health Safety and Environment (HSE) policy to protect all employees and associates working at PGS offices, construction sites and related facilities. It includes protection from every kind of pollution, hazard and accident that may result from its business.

Training

PGS will always have a comprehensive HSE training program to increase awareness of safety, to teach safer working practices and to promote environmental adherence. In the PGS Quality and HSE Manual all the roles and responsibilities of the individuals in the organization are clearly defined to promote a positive HSE culture in both head office and workshops.

Paravan Gostar Shomal
Construction & Installation Co.

Work Environment

All managers demonstrate a clear commitment to HSE to establish and implement a discipline procedure and an award program to run the HSE management system more effectively. HSE experts control conditions all times and issue permits for hazardous activities as necessary.

System monitoring

Monitoring is essential to maintain and improve HSE performance. PGS believes that proactive monitoring, which monitors the achievement of plans and the extent of compliance with standards before an accident, incident, illness or environmental leakage takes place, is a key factor in HSE performance.

Quality management

PGS's Quality Management System has been established based on the principles of minimal bureaucracy and documentation which allows, quick decision making and implementation. These features are achieved and successfully integrated into the quality management system by utilizing the site-based management and process approach.

Human Resources

We know that success comes through people. We are a large, national family, members of which strive to add value to everything we do. We realize the vital role that each one of us has, in meeting the needs of the company we serve. We respect the rights and dignity of our family members.
